Teaching Parents The How-To's Of Daily Online Security & Safety

Keeping Our Kids Safe Radio

Teaching Parents The How-To's Of Daily Online Security & Safety

Bill Wardell is the creator of the KOKS Radio Network which includes, a weekly radio show, podcast website, blog and social media networks to spread the message of online security & safety to parents worldwide.

Bill is the father of 3 children and husband to Anissa. Bill's love for his family has been the driving force behind his success over the last few years. Bill has been actively pursuing his passion of becoming an online entrepreneur and messenger in the field of online security & safety.

When Bill created his online persona "Your Online Security Authority" over 6 years ago, he set out to change the web and how it was used and perceived by concerned parents around the world.

Bill's passion is teaching parents how their children access the information around them and about life lessons on and off the information superhighway. Bill is more excited about what he is currently doing and how it will impact individuals, families, and groups today... than he was in the very beginning!

Bill set out to build a system designed solely and completely for parents in today's media driven technology based world we all live in today to teach and inspire them. Our Kids are being tested, studied, manipulated and catered too... now with their iPods, Smartphones or notebooks at their 24 hour day disposal and with the belief that they DESERVE it or are somehow entitled, parents to need to take a step back evaluate their families and make some choices before it is too late for their KIDS!

Bill has put his magic into a brand new project that will bring parents, families and kids closer together. Every week on the new Live KOKS Radio Show there will be tips and discussion on how to encourage the use of technology within the limits that each family schedules.

Awareness, Communication and Knowledge is where it all begins. Bill will be sharing his knowledge with parents everywhere on a weekly basis with his radio show and weekly updates on the KOKS blog. There will be a special section called "Trending with Teens". Daily and weekly updates will be available on Twitter and Facebook that will give listener's quick insight on hot topics. KOKS will provide answers and solutions for today's problems. Every teen or tween experiences technology and its good and bad consequences each and every day! KOKS will be there to provide the answers that families need now!

Bill's main focus has been working and dealing with the security issues of the day, such as ID theft, Online Predators, MySpace & Teens, and Keeping Our Kids Safe with ever-growing online security issues when it comes to Internet safety and protecting families.

Bill is the Author of 3 books:

Don't Take Candy from Strangers

CyberBullying: The New Face of Bullying

Think IT Won't Happen To You?

Bill is a radio security journalist, as well as an advocate for Keeping Our Kids Safe! He has well over 20 years of experience, owning and operating businesses offline and online. Bill has produced and hosted over 450 radio interviews with industry leaders worldwide. Bill is well known for his desire to help parents & families and also a great way to share his expertise of Online Safety & Security both as an Online Radio Host & Radio Security Journalist.
